## CERVICAL CANCER PROFILE

TOTAL POPULATION,  
FEMALE (2019): **2 456 000**

TOTAL DEATHS,  
FEMALE (2019): **17 800**

### Morbidity and Mortality

|  |             |
|--|-------------|
| Crude cervical cancer incidence per 100 000 women (2020):            | <b>26.1</b> |
| Age-standardized cervical cancer incidence per 100 000 women (2020): | <b>40.8</b> |
| Cumulative risk of cervical cancer, ages 0-74 (2020):                | <b>4.5%</b> |
| Cervical cancer deaths (2019):                                       | <b>470</b>  |
| Cervical cancer mortality-to-incidence ratio (2020):                 | <b>0.71</b> |
| Population-based cancer registry exists (2021):                      | <b>No</b>   |

### Primary Prevention

#### HPV vaccination programme coverage among girls (2020)

**1 in 10 girls in the primary target cohort in 2020 have received their final HPV vaccination dose**

#### HPV vaccination programme (2020):

|   |                 |
|---|-----------------|
| HPV included in national vaccination programme: | <b>Yes</b>      |
| Scale of vaccination programme:                 | <b>National</b> |
| Year of introduction:                           | <b>2019</b>     |
| Primary target cohort:                          | <b>9 years</b>  |

#### Related risk factors:

|  |             |
|--|-------------|
| Tobacco use prevalence, women aged 15+ years (2020): | <b>2%</b>   |
| Condom use at last high-risk sex (2013):             | <b>29%</b>  |
| HIV incidence per 1000, women aged 15+ years (2020): | <b>0.51</b> |

### Secondary Prevention

|   |           |
|---|-----------|
| National screening programme for cervical cancer exists (2021):   | <b>No</b> |
| Primary screening test used (2021):   | -         |
| Target age range of programme (2021):   | -         |
| Programme/guidelines exist to strengthen early detection of first symptoms at primary health care level (2021): | <b>No</b> |
| Clearly defined referral system exists from primary care to secondary and tertiary care (2021):                 | <b>No</b> |

#### Screening for cervical cancer (2019)

**Fewer than 1 in 10 women have been screened for cervical cancer in the last 5 years**

### Treatment and Supportive Care

|   |           |
|---|-----------|
| National guidelines on cervical cancer management exist (2021): | <b>No</b> |
|---|-----------|

|   |           |
|---|-----------|
| Number of radiotherapy units per 10 000 cancer patients (-):  | <b>ND</b> |
| Number of brachytherapy units per 10 000 cancer patients (-): | <b>ND</b> |

#### Cancer diagnosis and treatment services generally available (2021):

|   |            |
|---|------------|
| Cancer centre or cancer department at tertiary level: | <b>Yes</b> |
| Pathology services (laboratories):                    | <b>Yes</b> |
| Cancer surgery:                                       | <b>DK</b>  |
| Chemotherapy:   | <b>Yes</b> |
| Radiotherapy:   | <b>No</b>  |

#### Number of medical staff (per 10 000 cancer patients):

|                                     |           |
|-------------------------------------|-----------|
| Radiation oncologists (2019):       | <b>0</b>  |
| Medical physicists (2019):          | <b>ND</b> |
| Surgeons (2009):                    | <b>82</b> |
| Radiologists (2019):                | <b>ND</b> |
| Nuclear medicine physicians (2019): | <b>0</b>  |

#### Palliative care for patients with NCDs in the public health system generally available (2021):

|                                    |           |
|------------------------------------|-----------|
| In primary health care facilities: | <b>No</b> |
| In community or home-based care:   | <b>No</b> |

Reported annual opioid consumption - excluding methadone - in oral morphine equivalence per capita (2017): **0mg**

### WHO Cervical Cancer Elimination Strategy Targets for 2030

**90% of girls fully vaccinated with the HPV vaccine by the age of 15**

**70% of women are screened with a high-performance test by 35 years of age and again by 45 years of age**

**90% of women identified with cervical disease receive treatment**

ND = data not available

DK = don't know

\* **Programme coverage:** % of national target population (among 9-14-year-old girls)

† **Coverage by age 15:** % of population turning 15 that have been vaccinated against HPV at any time between ages 9 to 14
